TREWA

CONTRACT FURNITURE · INDOOR · OUTDOOR

**5 year
warranty!**

The self-closing comfort folding mechanism enables quick, easy and safe operation.

The table frames are made of 100% stainless steel and offered with a brushed surface or painted in 5 standard colours.

The automatically self-leveling slides ensure a wobble-free stand at all times.

Model TX1

The HPL outdoor tabletops are weatherproof, attractive and easy to care for.

Thanks to the stacking buffers, the tabletops can be stacked flat on top of each other to save space.

Four basic models with up to 51 table variants cover all the needs and design wishes of the catering industry.

TREWA TX

Our customers say this is
the best garden table in the world
for more comfort, safety, and profit in the gastronomy

Our convenient TREWA TX folding mechanism

self-closing, synchronised, symmetrical, elegant, robust

Four individually closing hooks fitted with tension springs automatically ensure secure and wobble-free support profile mounting. No more rickety hooks and rods!

The mechanism is operated using pivoted levers attached to both sides operating synchronously.

Table tops can be mounted and removed from both sides.

All support profiles are fitted with stack protectors, so table tops can be stacked flat without scratching each other.

The closed box made from durable stainless die-cast zinc minimises the risk of injuries and actually looks great, too!

Our convenient TREWA TX folding mechanism operating principle

This mechanism has a symmetrical design and works both clockwise and anti-clockwise

The TREWA TX convenient folding mechanism is incredibly easy to use from all sides. The tabletop can be quickly and easily inserted and removed from both sides.

Thanks to the stacking buffers, the tabletops can be stacked flat on top of each other to save space and avoid scratching. This saves time, money, and hassle.

1 Original position: pivoted lever pointing downwards, all hooks are closed.

2 The tabletop can be mounted in a vertical position from the left or right. The hooks snap into place automatically. The support tubes are already securely held in place.

3 Flip tabletop down; the spring-loaded hooks click into place automatically. The support tubes and hence also the tabletop are now held in place in a wobble-free and secure manner.

4 Turn pivoted lever to the left to open the left hook.

5 The tabletop can be flipped upwards to the right but does not yet unhook itself.

6 Turn pivoted lever upwards to open all hooks.

7 The tabletop can now be removed in a vertical position.

8 The mechanism also works the other way around.

The stacking buffers of the support tubes

Integrated, gentle, anti-slip

Thanks to the integrated stacking buffers, the tabletops can be stacked on top of each other to save space and avoid scratching each other.

The stacking buffers' stop function prevents the tabletops from slipping during transport.

Our TREWA TF fixed support brackets

simple, inexpensive, elegant, robust

You don't always need a folding mechanism. Instead of using our TX folding mechanism, you can also fit fixed TF support brackets which are also suitable for use with our table tops. This saves money and allows you to combine folding and fixed tables in an identical design on the same premises.

Table tops can still be removed by taking out the 4 screws, while the support brackets remain fixed to the table top. It is also possible to convert the tables to folding mechanisms later if required.

Our self-stabilising "autolevel" feet

Always automatically ensure a wobble-free positioning

Our TREWA T1 and T2 table models are fitted with automatically self-stabilising slides. These adjust to any uneven surface within seconds and ensure tables never wobble. And you will never have to level them manually again. This also saves a lot of time and effort when relocating the tables.

On uneven floors, standard tables wobble even if they're moved a few centimeters. Not so with the autolevel function of the TREWA T-tables.

Our TREWA T1 outdoor tables

Round tube with angled feet and “autolevel” function

The highlights of the T1 model

- Particularly elegant table frame made of round tubing with slightly angled legs
- The fully integrated, self-leveling „autolevel“ glides ensure a stable stand at all times
- The 4-legged frame is also available as a stackable version
- A 5-legged frame is available for round tabletops up to 120 cm in diameter
- The very wide range with over 50 table formats covers all needs

The TREWA T1 range

The TREWA T1 outdoor tables are available either as folding tables with the TREWA TX convenient folding mechanism or as fixed tables with TREWA TF fixed support brackets. All tables are equipped with the Autolevel function, except for the 3-legged tables, where this function is not useful. The images show tables with brushed stainless steel frames and Old Wood tabletops. For item numbers, details, and prices, please refer to our price list.

The eco-friendly TREWA T tables

durable, low-emission, easy-care, repairable, recyclable

TREWA T tables are manufactured in Europe, resulting in short transport routes. Their exceptional lifespan of 30 years or more reduces the environmental impact of replacements and saves costs. The modular design allows for flexible adaptation to changing needs, easy repairs, and single material recycling or disposal.

The table frames are made of approximately 98% corrosion-resistant and fully recyclable metals. The HPL tabletops contain a high proportion of renewable raw materials, have low emissions during production, and can be thermally recycled at the end of their lifecycle. Combined with low maintenance and repair costs, TREWA T tables offer an excellent ecological and economic balance over their entire lifecycle.

The extended TREWA warranty!

extensive, generous, fair

Our TREWA T outdoor tables are products of the highest quality. For this reason, they are covered by an extended 5 year warranty. This includes all parts except for glides and stack protectors, which are considered consumables. Our warranty therefore covers the complete table frame, the TX folding mechanism or fixed TF support brackets and the table top. Further information on our warranty can be found on our homepage www.trewa.com.
